Smart TRAIL - Product Information T&C Vectors TEFS Algorithms Complied

Smart-TRAIL™ is an Enterprise Nervous System that Fits into Any Industrial Enterprise belonging to any Domain. As a nervous system would do , It helps in the effective governance of an Enterprise. It Helps in day to day Advanced Programmed Management of the Enterprise - with foundational principles of Collaborative effort and Collective responsibility. The Foundation of the Product includes the breakthrough TEFS Algorithms from T&C Vectors.

- # A software System that scales out within the Enterprise Connecting every individual and Task to the software system such that the Entire Enterprise can be run using the nervous system by collective responsibility. The Software system intelligently guides the workings of all Tasks OR Projects by intelligent design as well as collaborative methods
- # A Software System That is [Multi Domain - Multi Disciplinary]. ie It Could be Used For any Project Management activity / Sales & Marketing activity / Human Resource Management activity / Manufacturing activity / Product Development activity etc. etc within an Enterprise belonging to the Software Industry / Insurance Industry / Engineering Industry / Energy Industry etc.
- # A Software system that's Collaborative in Nature. Person A is connected to Person B, C, D, & E. Person B can be connected to person A and even Person C, D & E. Hierarchical + Peer to Peer Connectivity.
- # A software System that Works Over Different Kinds of Geographies. The System could work 1) Internally in a LAN (Local Area Network) 2) It could work on the Extranet Through the Internet 3) It could Work on the Internet - Connecting People Inside the Enterprise to the People in Public Space.
- # eg: 1) Smart TRAIL connects people and Tasks within Enterprise USA 2) Smart TRAIL Connects people & Task of Enterprise USA with People and Tasks of Enterprise Europe. 3) Smart TRAIL Connects People and Tasks of Enterprise USA with any firm / Vendor / Supplier working with Enterprise USA.
- # Software System that keeps tracks of Past State / Present state and Future state of things . All such information is recorded and Displayed through Charts and Views
- # A Software System That has Integrated Mail alerts to your Email Address / Smart Phone.
- # A Software System that comes at a very Compelling Cost.

Smart TRAIL - Features Highlights	Smart TRAIL - Versions
<p>SMART TRAIL is a Sophisticated yet simple Software Tool that facilitates Management and Governance of an Entire Enterprise .</p> <p>The Software extrapolates to form a nervous system accomodating all working disciplines</p> <p>Primary Objective : To Facilitate Effective Enterprise Management - Macro Management + Micro Management of The Entire Enterprise.</p> <p>Secondary Objective : To Demonstrate Proof of Concept of TEFS Algorithms for effective incorporation in Development of Future Systems.</p>	<div style="display: flex; align-items: center;"> <div style="width: 15px; height: 15px; background-color: #e67e22; margin-right: 5px;"></div> <div style="margin-right: 10px;">Enterprise Edition — Micro</div> <div style="text-align: right;">1-500 Users</div> </div>
	<div style="display: flex; align-items: center;"> <div style="width: 15px; height: 15px; background-color: #95a5a6; margin-right: 5px;"></div> <div style="margin-right: 10px;">Enterprise Edition — Minor</div> <div style="text-align: right;">501 -1000 Users</div> </div>
	<div style="display: flex; align-items: center;"> <div style="width: 15px; height: 15px; background-color: #f1c40f; margin-right: 5px;"></div> <div style="margin-right: 10px;">Enterprise Edition — Major</div> <div style="text-align: right;">1001 - 5000 Users</div> </div>
